***AMA GUIDES* ENDING QUIZ**

HOW MUCH HAVE YOU LEARNED?

1. What is the maximum WPI% permitted as an add-on for pain? _____
 - a. On what page in the *AMA Guides* does this info appear? _____
2. If the underlying WPI% is 0% WPI, what is the maximum add-on for pain permitted by

DEU? _____

3. What is the WPI % for the following:

a. Fibromyalgia _____

1) On what page in the *AMA Guides* does this appear? _____

b. Thoracic Outlet Syndrome _____

1) On what page in the *AMA Guides* does this appear? _____

c. Tendinitis of Upper Extremity _____

1) On what page in the *AMA Guides* does this appear? _____

d. Epicondylitis (medial or lateral) _____

1) On what page in the *AMA Guides* does this appear? _____

e. Myofascial pain syndrome _____

1) On what page in the *AMA Guides* does this appear? _____

3. What are the two situations under the *AMA Guides* where grip strength is used for rating.

a. _____

1) On what page in the *AMA Guides* does this appear? _____

b. _____

1) On what page in the *AMA Guides* does this appear? _____

4. Applicant has undergone a TOTAL medial and lateral meniscectomy. What is the WPI%? _____

1) On what page in the *AMA Guides* does this appear? _____

5. Applicant has 50% binaural hearing loss. What is the WPI%? _____

1) On what page in the *AMA Guides* does this appear? _____

6. Applicant has suffered injury to the right shoulder and has the following motion measurements. What is his WPI%? _____

<u>Motion</u>	<u>Right</u>	<u>Left</u>
Flex	180/180/180	180/180/180
Ext	20/20/21	50/50/50
Abd	180/180/180	180/180/180
Add	30/30/29	40/40/40
Int. Rot.	40/41/42	90/90/90
Ext. Rot.	90/90/90	90/90/90

7. Applicant has suffered injury to the right knee. He has the following measurements. What is his range of motion? _____

<u>Motion</u>	<u>Right</u>	<u>Left</u>
Flexion	60/60/60	120/120/120
Flex. Contracture	0/0/0	0/0/0

- a) On what page in the *AMA Guides* does this appear? _____
8. Applicant has a herniated disc at L5-S1 of 5 mm per mri with radiating pain in the L5 distribution of right leg. He undergoes a laminectomy at L5-S1. After surgery, all symptoms and pain go away. After surgery, the lumbar spine problems create no impact on any activities of daily living. What is his WPI%? _____
- a. On what page in the *AMA Guides* does this appear? _____
9. Applicant has a 20% compression fracture at L1-2. The compression fracture produces maximum impact on his ADL's and limits him to the maximum degree in all ADL's.
- a. What is his WPI%? _____
- b. Where does the info on how impact on ADL's affects the rating appear in the *AMA Guides*? _____
10. Applicant has a right carpal tunnel syndrome which is confirmed by EMG. Applicant has the following findings:
- a. Abnormal monofilaments (maximum)
- b. Abnormal two-point discrimination (maximum)

c. No impairment in strength.

What is his WPI? _____

c. On what page in the *AMA Guides* do you find the value for the median nerve below mid-forearm?

d. On what page in the *AMA Guides* do you find the grading for sensory deficit? _____

e. On what page in the *AMA Guides* do you find the grading for motor deficit? _____

11. The patient is diagnosed with CRPS in the right arm. He has the following findings: CRPS right arm is swollen; right arm is warmer than left arm; right arm hair has begun to grow long. No other symptoms.

a. What is his WPI? _____

b. On what page in the *AMA Guides* does that information appear? _____

12. Applicant is diagnosed with sleep apnea. No formal sleep study is done.

a. What is his WPI? _____

b. On what page in the *AMA Guides* does that information appear? _____

13. Applicant is a male. He is diagnosed with impotence as a result of work injury. He is 70 years old. No testing is done.

- a. What is his WPI? _____
 - b. On what page in the *AMA Guides* does that information appear? _____
14. Applicant takes non-steroidal anti-inflammatory for his industrial low back injury. He is diagnosed with gastroesophageal reflux disease from the NSAIDS. His weight has remained the same from before the injury to the date of diagnosis.
- a. What is his WPI? _____
 - b. On what page in the *AMA Guides* does that information appear? (2 possible answers) _____

15. Applicant has a fusion of the lumbar spine at L3-4 and L4-5. After the fusion, he has no radiculopathy. His measurements are:

Motion

Sacral Flexion	50/49/48
True Lumbar Flexion	30/31/29
Extension	20/21/20
Right lateral	5/5/5
Left lateral	5/5/5

- a. What is his WPI%? _____
- b. On what page in the *AMA Guides* do you find the WPI for his fusions? _____
- c. On what pages in the *AMA Guides* do you find the WPI for his motions? _____

d. On what pages in the *AMA Guides* do you find the WPI for his nerve?
